SATURDAY, JUNE 6, 2020

Excerpt from 331 KSW June 5, 2020.

An Iranian woman asked Mr. Keshe, what is the vision (for Earth) for the next 3 years or more. He replied, our vision is very simple, we will see world peace. It's laid out very clearly, and actually, we have already entered it, it's just a matter of doing some polishing. It's the time for some nations to cleanup their own house for the wrongs they have done in the past, but that is their own internal war between themselves, and not with us. Like what we see happening in the United States.

A lot of things will not be what we see or know today, and we'll see progressive evolution in science and technology over the next 3 to 5 years. The main thing we will see is the disappearance of the armies. The military forces will be eradicated due to 2 or 3 factors. The knowledge we'll bring out will make the present arms obsolete. Additionally, the present situation in the world does not allow any nation to buy arms, because they cannot afford it, unless they are corrupt nations, and their leaders are trying just to put some money in the bank, and don't care about the situation in their country.

In the next 3 to 5 years we'll see eradication of hunger. I had this discussion in last Tuesday's teaching, when we were talking about using the satellites. In fact, the Keshe Foundation does not need to rely on satellites, because the technology you have is much better than satellites. The system which you will develop, will not only fly, but will also supply the energy needed for food. So in that sense, in reality, satellites have become obsolete.

We'll see the total and absolute eradication of the use of fossil fuels. This will happen very soon and very rapidly, because once the new technology on the Magnetical and Gravitational fields are released, people will take the engines out of their cars. It's so simple, and hopefully, this is what we are going to do in a very short time in the universities in Iran. This is one of the first projects I want to be in on, and it's on the table for the work that the universities want to do. And I told them, I am in on it with the KF Knowledge Seekers. We want to bring out a special system to do this, and I will be a part of everything. When this happens, we'll see many old tankers abandoned on the high seas where they will rot and pollute. So we have to make plans for them. With the reduction in the burning of fossil fuels, we'll see changes in the atmosphere that will lead to new illnesses because we won't be used to going back to a clean environment.

Other things we'll see are, in the next 3 to 5 years, the end of the drugs, and drug trafficking. Kingship and leadership will come to an end as collectively the human race will support itself. Hunger will come to an end through the process I explained earlier, as well as (the use) of medicines.

As we introduce the new flight systems, the present propulsion flights will become obsolete by their nature. Mankind will keep the Space Station as a memory of the “good old days.” Very soon, man will expand out into space, and be able to travel beyond the Moon and Mars, and even the solar system in a matter of minutes.

What I see is very simple, and is the fact of what I know, about what my technology can do, and what we see that it does. The world governments will change to it, because of the Corona. Corona wasn't that bad, it brought a lot of good things. We will see that the property market, more or less, will crash, and people will give you their houses to live in. In the next 5 to 10 years, with the present knowledge, people will have the option to not need to live in crowded cities.

One of the first things we'll see in maybe 2 to 3 years, is the end of mining. Keshe Foundation has been working in the background as part of its programs, and has already started setting it up in the Arizona test center. This means we do not have to deplete the planet for resources, nor destroy the farms, gardens, yards, jungles, and whatever. We will have respect for the planet, and the knowledge will come through transfer of the fields, so we don't have to let the earth do it.

In so many ways, one of the first things mankind will stop is the slaughtering of animals. The nature will find its own balance, and this is because it will be able to deliver food, or what we call,

energy for life. It is hundred percent sure that this is on the cards, to eradicate the use of animals. And we will see the end of the use of, and destruction of the planet.

Especially now, as we start with the Corona, people will have to accept the technology, and then all of these things will come together. And as it comes, and we accept that it works, then we will start building. The research and development of the new plasma technology, and the understanding of the “work of the universe,” will change everything rapidly.

What I see is colonization. Man will start colonizing very, very fast. Now we go to New York for the best restaurant, and soon we will go to Mars for a coffee, and come back. These are not dreams, these are on the cards right now. You will see it. We will make these places to fit us for living. As we have created the “dome of peace,” we will create a dome of life, living on different planets. In so many ways, we’ll not see entrepreneurs open beautiful restaurants and service stations, but rather they will build these centers across the space that people can watch the beauty of the creation.

Mankind’s way of working will change in the next 20 years. None of us will work to live, rather we will work for the pleasure of it. We’ll all become scientists and we’ll all become devoted to serve, because everybody else is busy doing nothing, and we all will do what we like to do.

I don’t wish it, I know what is to come. We will see a new life, a new cycle. I see a new birth, and that birth will change everything which comes with it. Birth of a new cycle for man, and with it will

come a birth of new cycle for the whole of the universe. We are the tiniest dust but, we will become the important dust.

I see a lot. I see the end of religions, because every man will become religious to the order of the correct order. We will believe through our own soul, and we'll see what the prophets saw. We'll live by their ethos, not by us talking about it.

There is one thing for sure, and that's for sure 100%, we'll see a lot of marriages, intermarriages between mankind and other races in the universe, who are here, but too shy to show themselves. We will see this because, now man has quieted, and has matured. They will not hide anymore in the clothes of man, but will be themselves. And this will shock a lot of us, because we won't eat them, we won't see them as food.

In so many ways, we have changed the course of humanity, and we'll see how the human race will respond to it. My vision is very simple, because I know what I brought, and I know what I planned, and I know what I am delivering, and I know what I am going to get for it. And there is one thing for sure, I will die in the most beautiful place in the universe, in the physical dimension.

End of excerpt. Transcription follows:

## **Vision For Next Years**

English Transcription: (331 KSW 4:16)

Q: I want to know what is the vision for the next 3 years, or more, I don't know, (4:16). I am new with this science ... from Iran.

K- Our vision is very simple. It's laid out very clearly. We'll see world peace, we already entered it, it's just a matter of polishing it. Some nations will cleanup their own house for what they have done wrong before, but that is their internal war, between themselves, not us. As we see in the United States. Otherwise it's cleanup time for themselves.

Progressively we see the evolution in science and technology, and a lot of things in the next 3 to 5 years will not be what we see, what we know today. Mainly we will not see armies, we will see eradication of military forces due to 2 or 3 factors. The knowledge brought out and we'll bring out will make the present arms obsolete. Secondly, the present situation in the world does not allow no nation to buy arms. They cannot afford it, unless they are corrupt nations who try to, just put some money in the bank, it doesn't matter what the nation does.

Then we'll see eradication of hunger in the next 3 to 5 years. I had this discussion in the teaching last Tuesday, that we were talking about the satellites. In fact the Keshe Foundation does not need to rely on satellites. You have the technology much better than satellites. The system which you develop, will fly and supply the energy needed for food. Satellites in reality have become obsolete, in that sense. (4:18). but at the same time, we see the eradication of total and absolute eradication of use of fossil fuel.

Very soon, very rapidly, we'll see the end of use of fossil fuel, because once the new technology on the Magnetic and Gravitational field released, people will take the engines out of

their cars. So simple. This is what we are going to do hopefully, in a very short time in Iran, in the university. This is one of the first projects I want to be in it, it's on the table of the work that the university wants to do, and I said, I am in it with the KF Knowledge Seekers. We want to do, we want to bring a special system out, and I am in it for everything which is going to be. So we see, many, many old tankers you see on the high seas, they'll stay there. They rot and they pollute, and so we have to plan for them. It's the beauty of what we'll get back. We'll see by reduction in the use of what we call, fossil fuel a lot of changes. We'll see new illnesses due to change of atmosphere, because we go back to more clean atmosphere, and we are not used to it.

We see the end of the drugs, and drug trafficking in the next 3 to 5 years. We do not see anything in that line. What I see, is the end of what we call the present propulsion flights as we introduce more and more, new flight systems, because they'll become obsolete by their nature. What I see, mankind will keep the space station as a memory of "good old days." Very soon, because man will move beyond space, into Mars and Moon, and beyond solar system in a matter of minutes. (4:20).

We see the end of kingship and leadership, it will become a collective human race to support itself. I see the end of hungers through the process as I explained, and the same (with) medicine. What I see is very simple, is the fact of what I know my technology have, and in fact we see, the world governments will change to it because of the Corona. Corona wasn't that bad, it brought a lot of good things. What we see is more or less the crash in the property market. People will give you their houses to

live in it, because with the present knowledge and what is to come in the next 5 to 10 years, people do not need to live in crowded cities. There will be an option.

What we see, one of the first things, in the next, maybe 2 to 3 years, is part of the program of the Keshe Foundation, what we will be working in the background, is end to mining. That will come very, very fast, and the beginning of it is already setup in Arizona testing centers. Which means we do not go into the resources to deplete and destroy the farms, the gardens, and the yards, the jungles and whatever. We will have respect for the planet. The knowledge will come through transfer of the fields. We don't let the earth to do.

In so many ways, I see the end of slaughtering animals, that is one of the first things mankind will stop. The nature will find its own balance, and this is due to be able to deliver food, or what we call, energy for life, will eradicate the use of animals. This is hundred percent sure will be on the card. On the other hand, (4:22). we'll see the end of use of, and destruction of the planet. These all will come together, now especially that we start with Corona, now that the technology comes, people have to accept it, because of the Corona. And as it comes, we accepted that it works, we start building. The research and development in the new technology of the plasma and understanding of the work of the universe, will change that rapidly.

What I see is colonization. Man will start colonizing very, very fast. We go to New York for the best restaurant, we go to Mars for a coffee and back. These are not dreams, these are what is on

the card. You will see it. We will make these places to fit us, as living. As we have created the “dome of peace,” we’ll create a dome of life, living on a different planet. In so many ways, we will see entrepreneurs will not open beautiful restaurants and service stations, they’ll build these centers across, and different routes that people can and watch the beauty of the creation.

Mankind’s way of working will change in the next 20 years. Well none of us will work, because we have to work to live. We will work with the pleasure of it. We’ll all become scientists and we’ll all become devoted to serve. Because everybody else is busy doing nothing, and everyone else will do what they like. I don’t vision, I know what is to come. We’ll see a new life, a new cycle. I see a new birth, and that birth will change everything which comes with it. Birth of a new cycle for man, and with it will come a birth of new cycle for the whole of the universe. (4:24). We are the tiniest dust but, we become the important dust.

I see a lot, end of religions, because every man becomes religious to the order of the correct order. We believe through the soul of ours, and we see what the prophets saw. We’ll live by their ethos, not by us talking about it. There is one thing for sure, and that’s for sure 100%, we’ll see a lot of marriages, intermarriages between the mankind and other races, who are here, too shy to show themselves, because now man has quieted, man has matured, we will see that. They will not hide in the clothes of man, they will be themselves. And this will bring a lot of shock to a lot of us, because we don’t eat them, we don’t see them as food.

In so many ways, we have changed the course of humanity, and we’ll see how human race will respond to it.

My vision is very simple, because I know what I brought, and I know what I planned, and I know what I am delivering, and I know what I am going to get for it. And there is one thing for sure, I will die in the most beautiful place in the universe, in the physical dimension.
